Atlantic GSM 10

How many inputs and outputs?

2 Inputs – 1 Output

OPTIONAL: Expansion module may be added that gives you an additional 8 Inputs and 8 Outputs

Can I monitor my house alarm?

Yes, you can

Can I switch on a pump with this unit?

You can. When you get a warning your tank is low you can activate the pump with your cell phone

Will it let me know when the pivot got stuck?

Yes. By monitoring the safety circuit you can then switch off your pivot or pump with your cell phone

Can I use it for cable theft?

Ideal. As soon the electricity is cut you will get a sms 'cable theft' and/or 'power off'

Does it really work from anywhere?

Yes, as long as there is cell phone coverage

Which service provider must I use?

Any service provider can be used. Pro Data Contracts for R9,99excl vat p/m is available, but other contracts may also be used

Is the sim card the customers property?

Yes, the sim card stays the property of the customer. The customer must obtain a sim card and contract for this unit

Programming of this unit, how does it work?

The customer can do the programming and changes himself over the internet as long as he has internet coverage. And the best of all it is FREE!!!!
