- ? IS THE ELECTRIC FENCE ACTIVATED?
- ? HOW CAN I MONITOR ELECTRICITY COMSUMPTION?
- ? IS THE ALARM ACTIVATED?
- ? WILL I RECEIVE AN ALERT IN THE CASE OF A FIRE?
- ? MUST I GIVE EVERY RESIDENT A REMOTE TO OPEN THE MAIN GATE?
- ? IS THE SECURITY LIGHTS ON?
- ? IS THE SWIMMING POOL PUMP ON?

How many inputs and outputs?

4 Inputs – 2 Outputs

OPTIONAL: Expansion module may be added that gives you an additional 8 Inputs and 8 Outputs

Must I give every resident a key or remote to open the main gate?

No, resident only dial the gate's number, when number is recognized the gate will open. Events at the gate can even be monitored by downloading it from the server daily.

Will I know when the gate is not working?

Yes, it's got a watchdog-timer for gate malfunction.

Can I switch on stuff with the unit?

Yes, simply program the unit to do it. You can switch on swimming pool pumps, alarms, security lights, pivots, geysers, electric fences, etc.

Can I use it with my alarm system?

Ideal for alarms. As soon as the alarm is triggered up to 5 numbers will be notified.

Can I monitor electricity usage?

Yes, you can get reports on power consumption every day by downloading it from the server.

Can it be used anywhere?

Yes, but there must be cellphone coverage.

Which service provider must I use?

Any service provider can be used. Pro Data Contracts from R9,99excl vat p/m is available, but other contracts may also be used

Is the sim card the customers property?

Yes, the sim card stays the property of the customer. The customer must obtain a sim card and contract for this unit

Programming of this unit, how does it work?

The customer can do the programming and changes himself over the internet as long as he has internet coverage. And the best of all, it is FREE!!!!
